

Architectures using Fabric

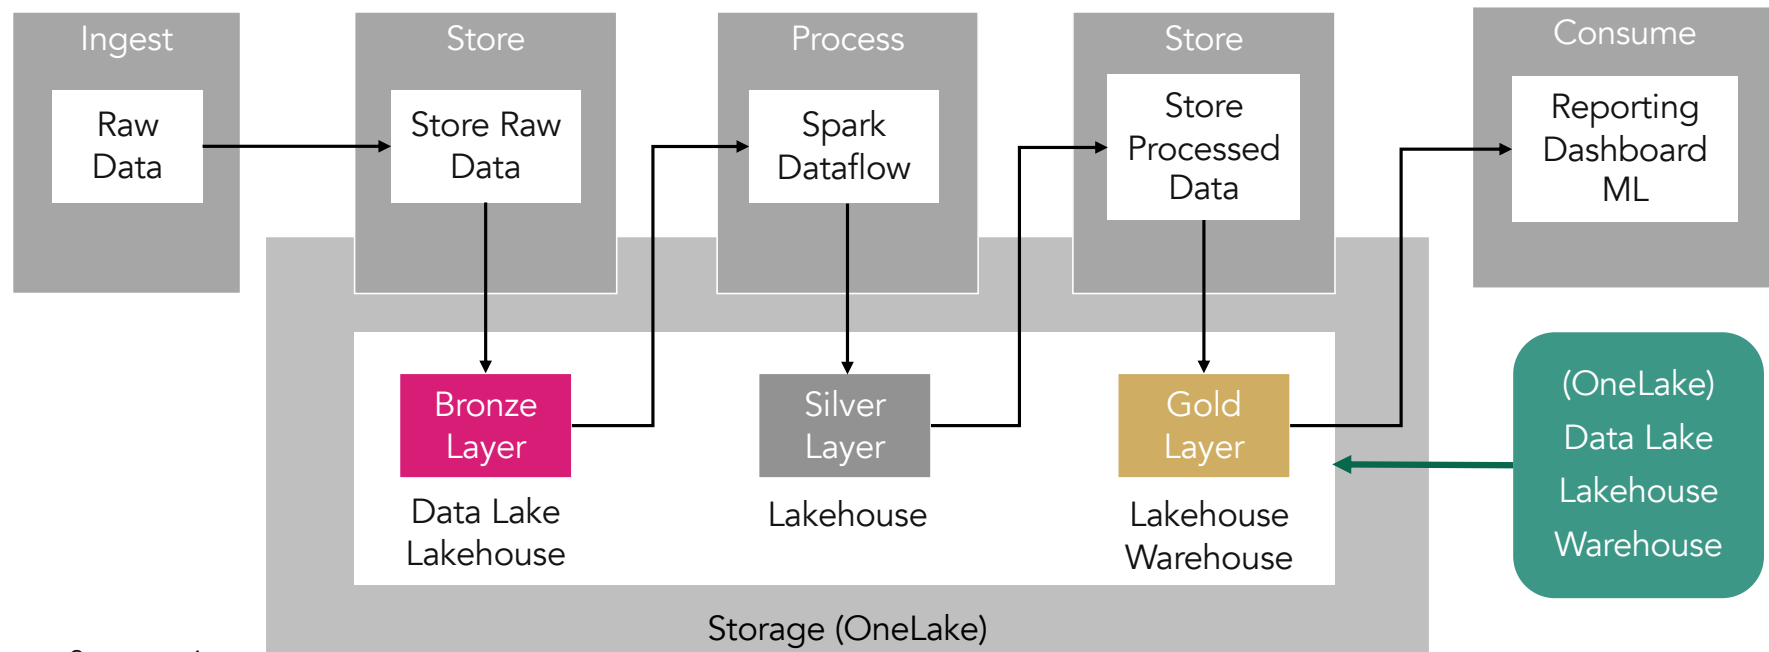

www.3aayaam.in

Fabric in Data Pipeline

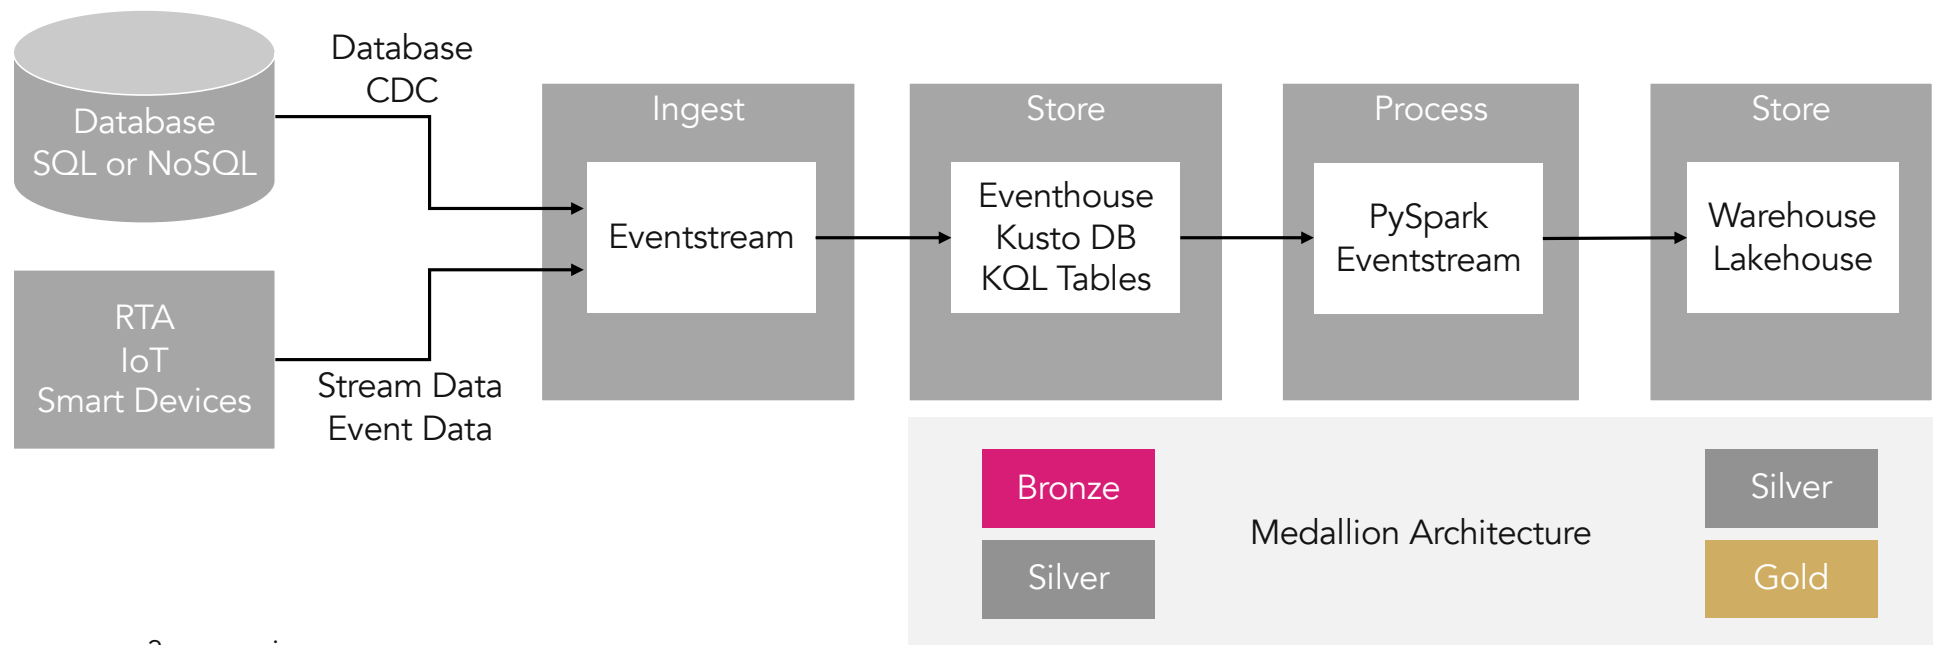

Medallion Architecture

- Storage Architecture.
- How to store data at various stages.

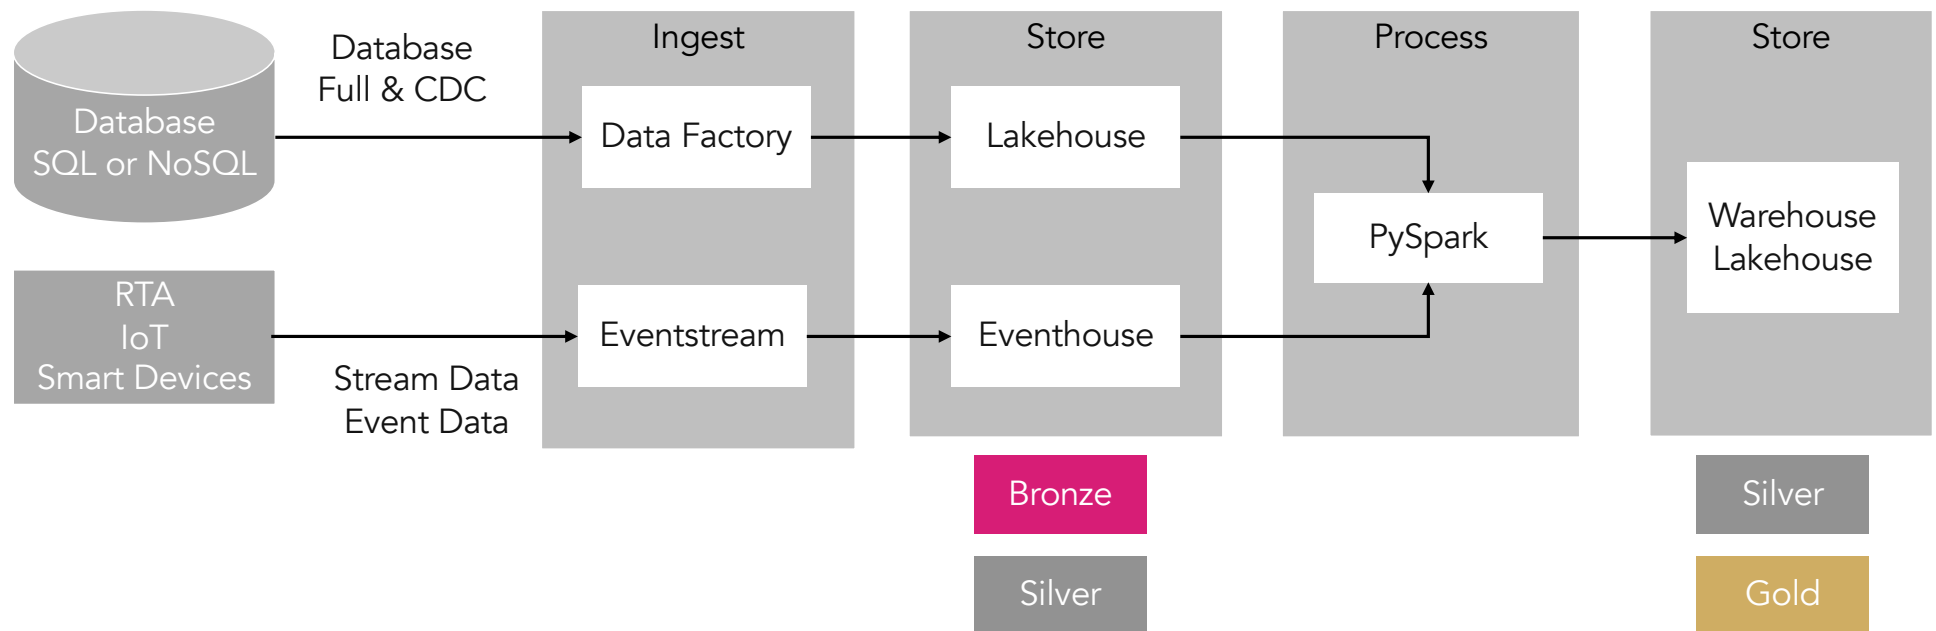

Kappa Architecture

- Consolidation of batch and stream processing.
- Everything is stream processing.

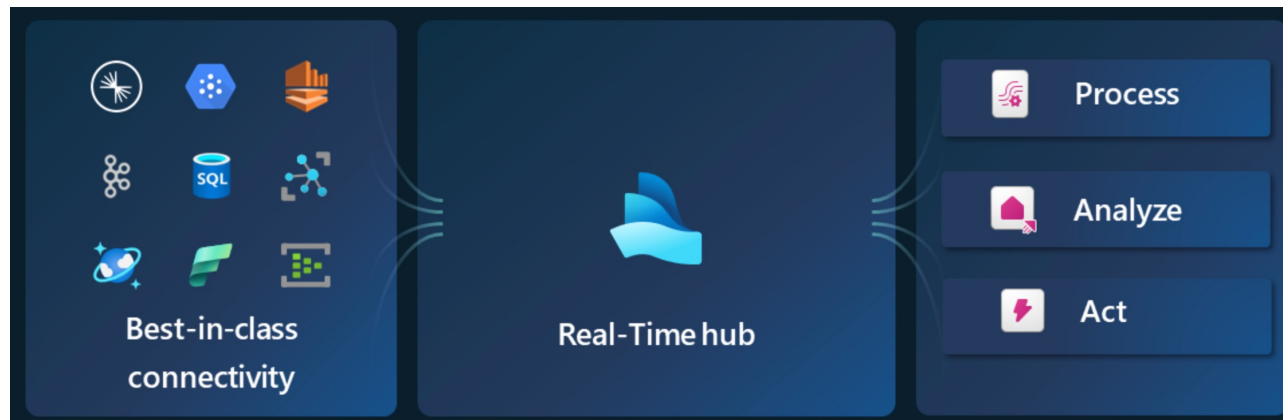

Lambda Architecture

- Separate batch and stream processing.

Real-Time Hub

- Metadata for Data in Motion.
- Connectors from different sources.

OneLake Catalog

- Single place to find all Fabric Items.
- Can be used to govern and secure data from a single place.
- Explore Console.
